Dear Sir,

CORRECTION OF MEDIA REPORTS ON ADVENT ENERGY SITE SURVEY FOR DRILL TARGETS IN PEP11 OFFSHORE SYDNEY BASIN

MEC Resources (ASX: MMR) advises that media reports regarding the timing of a small-scale geophysical site survey in PEP 11 as taking place between October 2009 and September 2010 are inaccurate.

MMR's investee Advent Energy ("Advent") is progressing plans to drill in PEP 11, offshore Sydney Basin, following the lodging of necessary applications for environmental approval.

Advent has made two separate submissions to the Department of Environment and Water, Heritage and the Arts to carry out a small-scale geophysical site survey in PEP 11 and for approval to drill one exploration well in the permit.

The survey will take place following the receipt of the required approvals.

The survey will cover two areas of 12 square kilometres each within the potential drilling area to acquire further geophysical information for potential future exploration drilling. The timing of the survey is dependent on vessel availability and will take place over about four days at each location.

Following the completion of the survey, the well would be drilled vertically to a depth of 2500m and wireline logs will be run to determine the presence of any hydrocarbons, and is expected to take 30 days to drill.

Bounty Oil and Gas currently holds a 75% interest in PEP11. Advent Energy holds a 25% working interest through its wholly owned subsidiary, Asset Energy, and has the right to earn an 85% interest from Bounty Oil and Gas.

Yours faithfully,

A handwritten signature in black ink that reads "D. Breeze". The signature is fluid and cursive, with a large initial "D" and "B".
